Universida de Vigo

Lodz University
of Technology

The University of Vigo in Spain and the Lodz University of Technology in Poland are offering a double international degree in Telecommunications and Electronics. Students will earn an international double Master's degree:

- > **Master in Telecommunication Engineering (MET)** from the University of Vigo, and
- > **Master of Science in Electronics and Telecommunications (MSET)** from Lodz University of Technology.

A maximum of 10 students can participate in this program, with 5 students from the Lodz University of Technology (TUL) and 5 from the University of Vigo (UVigo). To be eligible, students must first be admitted to either the Master in Telecommunication Engineering at UVigo or the Master of Science in Electronics and Telecommunications at TUL.

Participants in this double degree program will spend two semesters at each university. In the third semester, students from TUL will complete internships in Vigo, while students from UVigo will do so in Lodz. All participants will spend the final semester at the University of Vigo, where they will defend their Master's thesis.

Admission to the ETDM Degree.

To apply to enter the Double Master Degree, students must have been previously admitted and be enrolled to the Master in Telecommunication Engineering from the University of Vigo or Master of Science in Electronics and Telecommunications from Lodz University of Technology.

Additionally, students must certify a B2 level in English.

Once the enrollment period for both the MET and MSET programs has ended, and before November 30 of the current year, an application period will open for enrolled students to apply for admission to the Double Master's program.

A maximum of 5 students from UVigo and 5 from TUL will be admitted to the program.

Selection will be based on academic results and language skills. The selection process will be conducted in collaboration between the two institutions, and final admissions will be made in accordance with the regulations of the receiving institution.
